Steamer With 5 Variable Temperature Control

Characteristics:-

1. Steam is known to be the gentlest, safest, most efficient method to remove wrinkles from fabrics.
2. The powerful action of the steamers will penetrate the fibres of the fabrics, relaxes them and causes the wrinkles to release.
3. Unlike ironing, the gentle method of steaming increases the life of clothing.
4. Garment steamers breathe new life into fabrics; conversely, ironing crushes clothing fibres.
5. Many users of our steamers have found that steaming is up to five times faster than conventional ironing.
6. Suitable for use on various types of fabrics, from thin to thick materials.
7. Durable outer housing and impact resistant water reservoir.

Model	Temperature Control	Wattage (W)	Voltage (V)	Gross Weight (kg)	Packing Size (mm)
KW-353	N/A	1800	240	8.0	395 x 220 x 480
KW-358	5 settings available	1800	240	7.6	500 x 270 x 340
